

Jomark Graphics is at the forefront of the **direct to substrate digital printing** revolution. We can print directly on a wide variety of substrates from cardstock, foamcore, gatorboard, sintra and styrene to acrylic, glass, tile and carpet. Fast, cost-effective direct to substrate printing is an excellent choice for point-of-purchase graphics. Other applications include outdoor signage, special event graphics, golf-outing signs, lifesize cutouts, wall murals, kiosk graphic panels, museum displays and informational signage. Direct to substrate printing offers quality graphics, fast turnaround and a competitive price. Cost savings are achieved by eliminating the paper print, mounting and lamination.
