

Jomark prints on a wide variety of **fabrics**, from cotton and silk to polyester and canvas. We produce banners, signage, flags, apparel and home furnishings. Fabric banners are an elegant way to promote high-end products. Interior designers come to Jomark for custom color matched fabric for bedding, curtains, window treatments and upholstery. Architects use digital printed fabrics for wall treatments for hotel rooms, office interiors and restaurants. Digital printing is a cost-effective way to produce short runs of fabric. Many printed fabrics are washable and rated for exterior use. Lightweight fabrics cost half as much to ship as vinyl banners and 80% less than hard panel graphics. They are available in a large variety of materials and sheens, many made with recycled materials. Most are completely washable and water-proof giving them years of added use.
